

CEPA SUPPLIER

January 2025 Newsletter

HAPPY NEW YEAR 2025

The Board of Directors, CEO, and the Team at CEPA hope that all our members have had a joyous Christmas and have a Happy New Year. Members will be pleased to know that the Co-operative continues to grow and gain financial strength through an ever-expanding membership base, and our commitment to the Co-operative ethos of, competitive pricing, honest and transparent operation, exceptional service, and responsible management.

CEPA continues to support local community groups, albeit in 2025 through a new system of Sponsorship for Members that will benefit both Members and their preferred organisations. Watch out for details and Application information in our Newsletters. We hope that you value the CEPA monthly Newsletter and again welcome any input members may wish to contribute to it. Please contact Melissa at the Co-op to discuss your ideas Ph 03 5443 6072.

After 26 and a half years at the CEPA helm, I have made the difficult decision to retire from full time work. The Board of Directors have engaged a professional Recruitment Company to find my replacement. The process is well underway, however not yet complete, and more information will be forthcoming as it comes to hand.

I will however, remain for a specified period as a 'Transition Consultant' for 2 days per week, assisting in the seamless handover and familiarisation of our Co-operative, with the new incumbent. You will all probably be aware that I have absolutely loved my time at CEPA and will miss the daily business intensity dramatically. Thank you all for your amazing support and friendship over the years, as together we have all made the business a model of success and an industry leader.

Please continue to support your Co-operative and enable continued growth and prosperity.

The team at CEPA are the best in the business and will look forward to seeing you all again in 2025, to work hard and support your every Stockfeed, Animal Health and General Farm Merchandise needs.

Merry Christmas and a Happy New Year to you ALL.

Rob Bogumil, CEO, CEPA Co-operative Limited

Remember : "It's YOUR Co-operative and We're Working for YOU"

KEEPING YOUR HORSE COMFORTABLE DURING PERIODS OF HOT WEATHER

- Ride early or late in the day to avoid the hottest temperatures.
- Use cold water hosing or sponging to cool your horse after exercise. Apply cold water, scrape it off, and pour on more to carry heat away.
- Allow your horse to drink during and after exercise periods. Frequently give your horse water until it has consumed as much water as desired.
- Think about your horse's condition frequently as you ride. If your horse gets hot, sweaty, and is breathing hard, take a break.
- If you accidentally overdo exercise and your horse is still hot and breathing hard several minutes after stopping exercise, make every effort to reduce its body temperature.
- With older horses or those in obese or unfit condition, take care to limit exercise in hot weather. These horses may get overheated more quickly and be less able to lose excess heat.
- All horses should have access to a salt block. If your horse is working regularly in hot weather, consider using an electrolyte supplement.
- Be sure your horse is comfortable even when it is not working. Provide access to plenty of fresh water and a shady spot to rest. Use a fly sheet or fly spray as needed to guarantee he or she can relax. Putting sunscreen on white or light-colored muzzles will keep sensitive skin from getting painfully burned.
- Anhidrosis (not producing enough sweat) is an often overlooked cause of heat intolerance or poor performance. Consult your veterinarian.

Kohnke's Own® Summer Equine Tips

THE FUTURE OF HORSE NUTRITION

Turning out your older, well-conditioned show, dressage horse or pony out over the Christmas holiday season?

Be aware that there is a high risk of summer acute laminitis and founder within 3-4 days of full time grazing.

If this occurs, it's recommended by Kohnke's Own that horses should be in a yard overnight and fed soaked hay and a small snack of dampened chaff with a supplement of Kohnke's Own TRIM.

TRIM maintains a safe sugar metabolism for horses at risk of laminitis due to underlying Insulin Resistance.

Travelling with your horse in Hot Weather?

5 days before, during travel and competition mix 30g of Kohnke's Own Cell Salts for a 500kg horse and equal amount of plain, fine salt into the feed each day to maintain normal blood salt levels.

Prior to, during travel and rest stops provide dampened hay and 5 litres per 100kg body weight of cool clean water.

WHICH SHEEP PELLET DO YOU USE TO FINISH OFF YOUR LAMBS?

EWE & LAMB

High quality energy & protein sources. Designed with added availability to fodder options such as Pasture, Hay, or Silage. Designed to improve feed efficiency conversion, manage body condition & meet your flocks reproductivity targets.

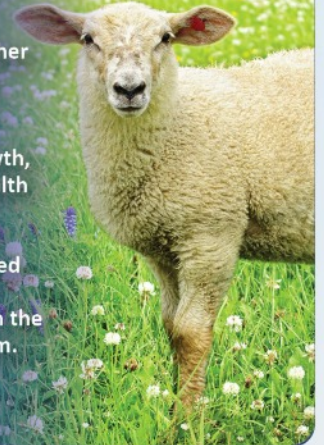

LAMB GROWER

Reid's Lamb Grower Pellet is an optimised protein & energy supplement feed to stimulate early feed intakes, that will promote early growth & good rumen development. Can assist in weaning off heavier lambs, earlier in the season.

LAMB FINISHER

Reid lamb finisher is designed for optimal feed conversion efficiency, growth, and animal health in your lambs. Larger particle size is considered for slower fermentation in the digestive system.
